ANGLE NOTCHING MACHINES

VARI 220/6 - COMBI 220/6

STANDARD EXECUTION

- Hydraulic angle notching machine with variable angle 30-140°.
- Automatic blade gap adjustment.
- 2 positioning stops with scale, adjustable every 15°, clamping handle for intermediate positions
- Large working table with double slots and brass scales.
- 60° negative blades to cut stainless steel.
- 2 mechanical plate holddowns.
- Mechanical vertical stroke adjuster with read out.
- Internal stop with milimetric scale.
- Transparent hand-safety quards.
- Footpedal control.
- Hydraulic oil.

EXTRA WORKSTATION ON COMBI 220/6

- Cavity to accept punching, rectangular notching and bending tooling.
- Bending speed adjustment from 0 to 10 mm/s.
- Backgauge for bending operations,
- Adjustment of working pressure.
- Working table with slots.
- Press capacity 200 kN.
- Millimetric scales.
- Transparent hand safety quard.
